

Lines

Maria paid \$188 for some jeans and t-shirts. A pair of jeans costs \$26, and a t-shirt was \$16 cheaper than a pair of jeans. If Maria bought 3 pairs of jeans, how many t-shirts did she buy? Explain.

Angles

Amy has 72 pieces of candy in a bag. She keeps $\frac{1}{4}$ of them for herself, but shares the remainder between 6 of her friends. How many candies will she give to each of her friends?

Polygons

Ellis borrowed \$78 from his sister to buy a frame. If Ellis pays off \$5 of the debt each week, how many weeks will it take him to pay off the entire debt?
